Endodontists from around the world to gather for AAE17

Annual meeting is April 26-29 in New Orleans

Registration is open for AAE17, the annual meeting of the American Association of Endodontists, taking place April 26-29 (Wednesday through Saturday) at the Ernest N. Morial Convention Center in New Orleans. Billed as the world’s largest education, exhibit and networking event for endodontists, AAE17 features a broad range of speakers, an exhibit hall and a number of special events.

This year’s general session will feature keynote speakers James Carville and Mary Matalin, New Orleans residents and one of America’s best-loved political couples. Other special events include the President’s Breakfast, the Louis I. Grossman Ceremony, recognizing the newest diplomates of the American Board of Endodontics, and the Edgar D. Coolidge Jazz Brunch, honoring the AAE’s award winners. Making the most of the Crescent City, the Welcome Reception will feature New Orleans-style cuisine and entertainment, while attendees will join a brass band to march to “Celebrate New Orleans!” at Generations Hall.

On the show floor, attendees will be able to visit with nearly 100 vendors to explore the latest in endodontic equipment, materials and supplies, as well as practice management and other business resources to support endodontic practices.

There are plenty of educational opportunities, offered in many different settings.

“My goal for AAE17 is to offer a highly scientific, evidence-based program, and to include speakers new to presenting at the annual meeting,” said AAE President Linda G. Levin. “I also want attendees to enjoy all that New Orleans has to offer — from the sights, sounds and cuisine, there will be no mistaking we’re in the Big Easy.”

AAE17 offers more than 100 educational sessions in a variety of tracks, including “Pulp Fiction,” which will address controversial and misunderstood topics in the specialty; “Saving the Natural Tooth,” sharing the latest evidence and recommended treatments to save patients’ teeth; and “Surgical and Non-surgical Endodontics.” The highlight of the surgical endodontics track is live, 3-D microsurgery. Dr. Syngcuk Kim will perform two live endodontic microsurgeries using 3-D technology that allows attendees to view the procedure as the surgeon sees it through the microscope.

More educational highlights

Dr. L. Stephen Buchanan will offer “CT-Guided Endodontic Procedures” on Saturday from 12:45 to 1:30 p.m. in Room 244. CT-guided implant surgery has been around for more than a decade and has grown as the sine qua non of implant surgery. This technology is directly applicable to endodontics, both for conventional access preparation and apical surgery. This presentation will review CT-guided implant technology and Buchanan’s clinical cases using this method for conventional and surgical endodontic treatment. It will show how clinicians can set up and use this paradigm shift in procedural treatment planning for root canal therapy as well as for implant placement for those endodontists who want to add implant surgery to their practices.

Dr. Anne L. Koch will offer two presentations, starting with “The Single Cone Bioceramic Sealer Obturation Technique: A Historical Perspective” on Saturday, from 8:30 to 9:15 a.m. in Room 349. Recently, it has been reported that a single cone bioceramic sealer technique has been used in 20 million cases. It is known as an excellent technique, based on science, and one that has gained worldwide acceptance. Consequently, Koch will review this technique from its inception, through its development, and ultimately to where it is today.

And, drawing on her personal experience, Koch will also present “Treatment of the Transgender Dental Patient” on Saturday from noon to 12:45 p.m. in Room 349. As Koch will explain, transgender patients have historically been stigmatized, both in the medical and dental fields. The purpose of this presentation is to educate endodontists, residents and staff about the medical and psychological needs of
Sonendo to showcase its GentleWave technology at meeting in New Orleans

Sonendo® — manufacturer of the GentleWave® System featuring Multisonic Ultracleaning™ — is bringing its technology and fun to AAE17, the annual meeting in New Orleans, April 26-29 at the Ernest N. Morial Convention Center. Among the many highlights for Sonendo will be a presentation titled “Mini- mizing the Incidence of Endodontic Treatment Failure by Maximizing Canal Debradement and Disinfection Using GentleWave Technology.” This lecture, part of AAE’s “To The Point” series, will be offered on Friday, April 28, from 12:15 to 1:15 p.m. in the exhibit hall.

The GentleWave Procedure provides an innovative alternative to existing standard root canal treatment techniques by predictably debriding and disinfecting while conserving more root structure, according to Sonendo. The presentation will highlight the main causes of standard root canal treatment failure and how the GentleWave Procedure may be beneficial in eliminating these failures. Sonendo will also host its 4th Annual 5K Fun Run, featuring warm-up by Science Cheerleader Wendy Brown. Participants can attend a meet-and-greet after the run, take photos and receive fitness gear. The warm-up starts at 6 a.m. on Thursday in Hilton Riverside’s Grand Salon A.

Sonendo will be in booth No. 649, and the company invites meeting attendees to stop by to learn from in-booth speakers and to experience hands-on demonstrations. More information is available online, at Sonendo.com/AAE17.

**REDEMPTION** Details: In lieu of a rebate check free goods are allowable. Please call for details. To receive rebate check or free product, please email or fax qualified invoices to Roydent Dental Products at (888)769-3368 or promos@roydent.com. Please note relevant promotional code(s) and if you prefer a rebate check or free goods. Free goods requests must include which free product is desired (including size, length, etc.). Invoices must be dated April 1, 2017 - May 31, 2017 and sent to Roydent Dental Products before June 30, 2017. File quantities must come from one invoice. Rebate checks will be made payable to Doctor or Practice Name on the Roydent Account. Please call for details. Mix-and-match permitted. Offer is available to contract and formulary customers. Please allow 4-6 weeks for delivery of rebate checks/free goods.
Dentsply Sirona Endodontic Suite opens at NYU College of Dentistry

On Thursday, Nov 17, 2016, NYU College of Dentistry (NYU Dentistry) celebrated the culmination of a goal set years earlier with a ribbon-cutting ceremony for the opening of the Dentsply Sirona Endodontic Suite. The new clinical suite, which employs the most advanced educational and patient care technologies available, was made possible by a partnership between NYU Dentistry and Dentsply Sirona, a manufacturer of professional dental products and technologies.

“Today,” said Dr. Charles N. Bertolami, Herman Robert Fox Dean of NYU Dentistry, “NYU has the most sophisticated endodontic facility in the nation, ensuring our ability to provide the finest endodontic education in an environment that reflects truly patient-centered care. And it could never, ever have happened without Dentsply Sirona.”

The suite features a fully integrated computer network with best-practice case management software; a fully equipped, state-of-the-art suite with 37 new treatment units, intraoral digital X-ray stations; state-of-the-art endodontic motors; ultrasonic units; cone beam solutions; intraoral sensors; and a cone-beam computerized tomography (CBCT) scanner, utilizing state-of-the-art scanning technology to produce 3-D images of teeth, soft tissue, nerve pathways and bone in a single scan. Dr. Asgeir Sigurdsson, associate professor and chair of NYU’s Dr. Ignatius N. and Sally Quarararo Department of Endodontics, expressed his appreciation for an endodontics department chair, Dr. C. John Fox, associate professor and chair of NYU’s Dr. Ignatius N. and Sally Quarararo Department of Endodontics, expressed his appreciation for the NYU Executive Vice President for Health Robert Berne said: “At NYU, the scarce commodity is space. The Dentsply Sirona Endodontic Suite is a magnificent example of a brilliant use of space. It is the lodestar for future renovation projects at NYU, the one that people will look to again and again, and it is a major contribution to the education of our students.”

Dean Bertolami expressed both the college’s and his personal appreciation to Bret W. Wise, executive chairman of the board of Dentsply Sirona, noting that when the college approached what was then Dentsply International last spring to propose a partnership on behalf of the new facility, the company was in the midst of a complex, international merger with Sirona Dental Systems. Nevertheless, Bertolami said. Wise immediately indicated his support and as soon as the merger was completed, renovation of the existing clinic began.

Wise said: “This was the first project undertaken by the newly merged Dentsply Sirona and represents our commitment to research, product development and clinical education. Now, one of the best departments of endodontics has the most modern clinical suite. With this new facility, the standard has been set, and together we’ve created an unparalleled environment for research and clinical education. Dentsply Sirona is grateful for this opportunity to collaborate with NYU to advance dentistry and improve oral health.”

Dr. Mark Wolff, the college’s associate dean for development, noted that the effort to renovate the endodontic facility had been years in the making, but once the partnership with Dentsply Sirona was underway, the entire renovation was completed in just three months, making it a “fitting testimony to the powerful synergy that can occur when academia and industry partner on behalf of a shared goal.”

A video of the ceremony can be viewed online, at https://youtu.be/NhT5UIEJZ60.

Available from CJM Engineering, Munce Discovery Burs™ are designed to be the answer to calcified canals, uncovering hidden canals, troughing the isthmus and cement-line dissection around roots.

The long, narrow shafts are designed to provide an excellent view corridor and ensure positive control, with the familiar tactile feedback of round burs.

Unlike ultrasonics, Munce Discovery Burs are heatless, not prone to spontaneous breakage and create a more readable drill-out.

Recently, Munce Discovery Burs were highlighted in Ingle’s Endodontics, one of the most popular textbooks in the world.

Dr. C. John Munce invented Munce Discovery Burs in 2004 after he noticed a lack of an economical and efficient alternative to ultrasonic tips. Today, he provides the burs to clinicians around the globe via his family-owned company, CJM Engineering. The company was founded in 1997 with Munce’s first patented invention, the Root Canal Projectors.

Munce enjoys lecturing worldwide on topics related to creative management strategies for endodontic complexities, and he has contributed to numerous textbooks. He is lead author of the “Preparation for Treatment” chapter in the seventh edition of Ingle’s Endodontics.

IT'S TIME TO GET REAL.

WHAT DO YOUR PATIENTS REALLY WANT?

Patients Want to Keep Their Real Tooth.
In a 2016 study published in JOE, patients named tooth retention as a top priority, second only to trust and communication about treatment options.

Patients Want to Avoid A Root Canal.
Consumers have feared the idea of standard RCT for decades. The result? Patients and providers alike are opting for implant-supported crown replacement instead of RCT.

Patients Want an RCT Alternative.
Enter the GentleWave Procedure—a minimally invasive, single-appointment procedure that delivers a higher standard of clean throughout the root canal system—and a lower chance of failure that can result in tooth extraction.

Talk to Sonendo about the GentleWave System today. Make the real difference for your patients and the economy of your practice. Visit sonendo.com/get-real.
