Westerners have plenty to look forward to at DTSC Symposia

People from around the world flock to the annual Greater New York Dental Meeting, and with very good reasons beyond the fact that there is no registration fee.

There’s something for everybody—even for those who might make the trip from the West Coast.

Again this year, Dental Tribune America has partnered with the meeting’s organizers to offer four days of symposia in the areas of endodontics, implantology, cosmetic and digital dentistry.

The meeting is scheduled for Nov. 29 to Dec. 2. Each day will feature four individual one-hour lectures on various topics led by experts in their fields.

Participants not only earn C.E. credits, but also gain an invaluable opportunity to learn diverse aspects of dentistry and how to integrate a variety of treatment options into their practice.

DTSC Symposia at the GNYDM — C.E. Program 2009

• Nov. 29, 10–11 a.m. One-step Adhesion, One-step Cementation George Freedman, DDS

Seventh generation adhesive materials have simplified the process of dental bonding and made esthetic procedures very predictable. These new products etch, bond and desensitize in a single step, and virtually eliminate postoperative sensitivity while decreasing the potential for marginal breakdown.

• Nov. 29, 11:30 a.m.–12:30 p.m. High-resolution Cone-beam with PreXion 3-D Dan McEwen, DDS

Cone-beam computed tomography (CBCT) offers a whole new paradigm to dental radiography. From what has been conventional 2-D images, dentists now have the ability to look at the maxillo-facial region in any direction and any thickness as well as in 5-D.

With the introduction of CBCT, the specialist and general dentist alike can now afford to own and enjoy the benefits of this fantastic diagnostic tool.

• Nov. 29, 1:30–2:30 p.m. Simplify Esthetic Dentistry Steven Weinberg, DDS

Dr. Weinberg’s presentation is a comprehensive, clinically-oriented program addressing the constant state of evolution in esthetic materials and restorative techniques.

Participants will learn about a variety of materials, techniques and philosophies to create beautiful, long-lasting anterior esthetic restorations in an exciting educational environment.

• Nov. 29, 3–4 p.m. The Beauty of Bonding Howard Glazer, DDS

This presentation will encompass the science of adhesion, the art of composite restoration and the finesse of finishing and polishing.

Using the most state-of-the-art materials, Dr. Glazer will explain the advantages and methods used to achieve the maximum esthetic and functional results for patients.

• Nov. 30, 10–11 a.m. E4D Sky: Dentistry’s Destination Gary Severance, DDS and Lee Culp, DDS

Demonstrating everything that dental professionals need for the design and fabrication of single-unit glass ceramic restorations, either chairside or benchtop, the program will be an interactive, entertaining and amazing display of all that modern dentistry offers for comprehensive care.

Dental Tribune Study Club schedule at-a-glance
This program focuses on the new technological advances that have made healing possible: scientific, accurate, reproducible and clinically significant caries detection; the potpourri of the ingredients and tools that the dentist needs for healing therapies; gioners, the new healing composite resin; photo-activated disinfection to promote remineralization and healing; and user-friendly laser technology to keep peri-oral treatment in your office.

- **Nov. 30, 1:30–2:30 p.m.**
  **OraVerse: In Practice**
  Steven Glassman, DDS
  OraVerse is a local anesthesia reversal agent that accelerates the return to normal sensation after routine dental procedures. Clinical documentation showing the safety and efficacy of the drug in clinical trials will be highlighted.

- **Nov. 30, 3–4 p.m.**
  **The Advantage of Small FoV High-resolution CBCT Imaging**
  Dan McEowen, DDS
  This presentation will instruct you on how to take a 360 degree rotation with either 512 or 1,024 projections during the scanning time. You will learn how to produce ready-to-go 5-D, sagittal and coronal images within 50 seconds after the scan axial.
  Dr. McEowen will introduce PreXion 3-D, the only CBCT scanning unit using its own built-in graphic cards, as well as 5-D rendering boards, which result in the highest resolution when considering all smaller FoV CBCT scanning devices.

- **Dec. 1, 10–11 a.m.**
  **Technological Resources and Biological Concepts in Minimally Invasive Endodontics**
  Renato Leonardo, DDS
  This course is ideal for the progressive general practitioner with a minimally-invasive practice. Along with hands-on training, clear demonstrations and an educational presentation, lecture participants can expect information about vital and non-vital pulp therapy, the Anatomic Endodontic Technology (A.E.T.) System and the Apical Delivered Oclusion (A.D.O.) System.

- **Dec. 1, 11:30 a.m.–12:30 p.m.**
  **Immediate Tooth Replacement in the Esthetic Zone**
  Barry Levin, DDS
  The time frame of three to six months of unloaded healing is not always mandatory any longer. With osteoconductive implant surfaces, newer implant materials and proper diagnoses, patients can often experience implant therapy without the inconvenience of removable temporary appliances and bonded provisional restorations.

- **Dec. 1, 1:30–2:30 p.m.**
  **More Than Just Teeth and Gums**
  Ron Schefchik, DDS
  Dental professionals are now incorporating blood screening, evidence-based practice.

**Anxious patients stress me out!**

**SUBJECT TO CHANGE**

**DOCS Education** offers a wide range of sedation dentistry and emergency preparedness courses that enable you to meet more patients’ needs. For a complete list of courses, locations, and dates, visit DOCSeducation.org.

**Oral Sedation Dentistry**
14 protocols to effectively treat more patients

**Pediatric Sedation Dentistry**
Helping more kids get the care they need

**Sedation Solutions**
Caring for medically complex patients

**IV Sedation for Dentistry**
Didactic and one-on-one clinical training

**DALS®**
Includes ACLS, medical, and sedation emergency training

**Call (866) 592-9617**

**Upcoming Course Locations**
San Francisco, CA | Nov 5-7, 2009
San Diego, CA | Feb 18-20, 2010
Seattle, WA | June 10-12, 2010

**Call (866) 592-9617** or visit DOCSeducation.org
based supplementation, laser therapy, DNA testing and physician referrals into their office protocol to improve dental treatment outcomes and improve the overall health of dental patients. Amazing patient testimonials and treatment outcomes discussed.

• Dec. 2, 3–4 p.m.
My First Esthetic Implant Case: Why, How and When?

Marius Steigmann, DDS
Esthetic dental implants are of increasing importance in today’s dentistry. Success from the esthetic aspect requires bone height and width, soft-tissue architecture and prosthetic restorations close to nature.

Of these three elements, it is the soft-tissue frame that can be maintained or reconstructed not only using surgery, but also with the right prosthetic elements.

The DTSC program is made available through educational grants provided by:
• SHOFU
• PreXion
• VOCO
• DAM
• Novolar Pharmaceuticals
• Ultradent
• Chase
• AMD Lasers
• DMG
• Straumann

The symposia are free for registered Greater N.Y. Dental Meeting attendees, but pre-registration is recommended. Also, due to limited seating, register early to ensure preferred seating.

For registration please visit www.gnydm.com or send an e-mail to info@gnydm.com. International attendees requiring visas should e-mail customerservice@gnydm.com.

For more program details, please check the schedule at www.DTStudyClub.com.
