Plenty to look forward to at DTSC Symposia

- Nov. 29, 10–11 a.m.; One-step Adhesives, One-step Cementation, George Freedman, DDS

Seventh generation adhesive materials have simplified the process of dental bonding and made esthetic procedures more predictable. These new products etch, bond and desensitize in a single step, and virtually eliminate postoperative sensitivity while decreasing the potential for marginal breakdown.

- Nov. 29, 11:30 a.m.–12:30 p.m.; High-resolution Cone Beam with PreXion 3-D, Dan McEwen, DDS

Cone-beam computed tomography (CBCT) has become the new paradigm to dental radiography. From what have been conventional 2-D images, dentists now have the ability to look at the maxilla and mandible as a whole and see any thickness as well as in 3-D.

With the introduction of CBCT, the specialist and general dentist alike can now afford to own and enjoy the benefits of this fantastic diagnostic tool.

- Nov. 29, 1:30–2:30 p.m.; Simplify Esthetic Dentistry, Steven Weinberg, DDS

Dr. Weinberg’s presentation is a comprehensive, clinically-oriented program addressing the constant state of evolution in esthetic materials and restorative techniques. Participants will learn about a variety of materials, techniques and philosophies to create beautiful, long-lasting anterior esthetic restorations in an exciting educational environment.

- Nov. 29, 3–4 p.m.; The Beauty of Bonding, Howard Glazer, DDS

This presentation will encompass the science of bonding, the art of composite restoration and the finesse of finishing and polishing. Using the most state-of-the-art materials, Dr. Glazer will explain the advantages and how you can use them to achieve the maximum esthetic and functional results for patients.

- Nov. 30, 10–11 a.m.; EAD Sky: Dentistry’s Destination, Gary Severance, DDS and Lee Culp, DDS

Demonstrating everything that dental professionals need for the design and fabrication of single-unit glass ceramic restorations, either chairside or benchtop, the program will be an intellectual feast and a visual feast: the amazing display of all that modern dentistry offers for comprehensive care.

- Nov. 30, 11:30 a.m.–12:30 p.m.; Know Your Products & Tools for Today’s Healing Dentistry, Gay Goldstep, DDS and Lee Culp, DDS

This program focuses on the new technological advances that have made healing possible: scientific, accurate, reproducible and clinically significant caries detection; the potpourri of the latest ingredients and tools that the dentist needs for healing therapies; gionmers, the new healing composite and user-friendly laser technology to keep perio treatment in your office.

- Nov. 30, 1:30–2:30 p.m.; OralVerse: In Practice, Steven Glassman, DDS

OralVerse is a local anesthesia reversal agent that accelerates the return to normal sensation after routine dental procedures. Clinical documentation showing the safety and efficacy of the drug in clinical trials will be highlighted.

- Nov. 30, 3–4 p.m.; The Advantage of Small FoV High-resolution CBCT Imaging, Dan McEwen, DDS

This presentation will instruct you on how to take a 560 degree rotation with either 512 or 1,024 projections during the scanning time. You will learn how to prepare ready-to-go 3-D, sagittal and coronal views within 50 seconds after the scan axial.

Dr. McEwen will introduce PreXion 3-D, the only CBCT scanning unit using its own built-in graphic cards, as well as 3-D rendering boards, which result in the highest resolution when considering all smaller FoV CBCT scanning devices.

- Dec. 1, 10 – 11 a.m.; Technological Resources and Biological Concepts in Minimally Invasive Endodontics, Renato Leonardo, DDS

This course is ideal for the progressive general practitioner with a minimally-invasive practice.

Along with hands-on training, clear demonstrations and an educational presentation, lecture participants can expect information about vital and non-vital pulp therapy, the Anatomic Endodontic Technology (A.E.T.) System and the Apical Delivered Obturation (A.D.O.) System.

- Dec. 1, 11:30 a.m.–12:30 p.m.; Affordable Soft-tissue Diode Lasers, Speaker TBD

The newest diode lasers cover the lighted.

When changing the teeth and gums, Ron Scheffore, DDS

Dental professionals are now incorporating blood screening, evidence-based supplementation, laser therapy, DNA testing and physician referrals into their office protocol to improve dental treatment outcomes and improve the overall health of dental patients. Amazing patient testimonials and treatment outcomes discussed.

- Dec. 2, 10–11 a.m.; Icon – Innovative Caries Treatment without Drilling, George Freedman, DDS

The course topics include: from research to chair-side; preserving healthy tooth structure; proximal and smooth surface treatment options; step-by-step clinical procedure; caries infiltration: present and future.

- Dec. 2, 11:30 a.m.–12:30 p.m.; Immediate Tooth Replacement in the Esthetic Zone, Barry Levin, DDS

The time frame of three to six months of unloaded healing is not always transmural anymore. Longer, with osteoconductive implant surfaces, newer implant materials and proper diagnoses, patients can often experience implant therapy without the inconvenience of removable temporary appliances and bonded provisional restorations.

- Dec. 2, 1:30–2:30 p.m.; More Than Just Teeth and Gums, Ron Scheffore, DDS

Dental professionals are now incorporating laser therapy, DNA testing and physician referrals into their office protocol to improve dental treatment outcomes and improve the overall health of dental patients. Amazing patient testimonials and treatment outcomes discussed.

- Dec. 2, 3–4 p.m.; My First Esthetic Implant Case: Why, How and When?, Marius Steigmann, DDS

Esthetic dental implants are of increasing importance in today’s dentistry. Success from the esthetic aspect requires bone height and width, soft-tissue architecture and prosthetic restoration.

Out of these three elements, it is the soft-tissue frame that can be maintained or reconstructed not only by using surgery, but also with the right prosthetic elements.

The DTSC program is made available through educational grants provided by: SHOFU, PreXion, VOCO, DSD, Novolad Pharmaceuticals, Ultra-dent, Chase, AMD Lasers, DMG, Straumann. For registration — it’s free for GNODM attendees — please visit www.gnydm.com or send an e-mail to info@ gnydm.com.
