Dentistry is mired in a perfect storm that challenges the profession from all sides: weak economies in the Unites States and worldwide, dental trade show attend ance declining every year, and dentists reluctant to close their offices or give up personal time (away from their friends and families) in order to take continuing education courses or spend time at trade shows like they did in the past.

On the vendor side, there are more than 150 trade shows in the United States and worldwide, and dentists are no longer the only buyers. They are building us better clinicians. They are procedural specific. They don’t build thinking or cultural environment.

Adaptive learning technology trains new dentists

DQ Technologies, manufacturer of the E4D Dentist™ system, has launched E4D Compare™ — an innovative adaptive learning technology tool for dental teaching institutions. E4D Compare provides evidence-based assessment tools that also document student progression. “The development of E4D Compare and its utilization in teaching institutions provide both students and faculty an innovative method of self-paced learning and a more consistent and objective evaluation of all parameters. This is another example of our commitment at DQ to making dentistry better at every level,” said Dr. Gary Severance of D4D Technologies.

Dentists create 24/7 online conference, tradeshow, C.E. forum

xpAPce and XPsquared launched

Fifteen leading experts serve as academic advisors, monitoring content and time lines of the xpAPce and XPsquared courses delivered online by world class scholars.
