Digital Dental

Digital Dental have the range to suit every working space.

Digital Dental offers a complete range of cone beam digital imaging systems.

The entry-level Uni-3D is a combined panoramic and small FOV cone beam CT (CBCT) scanner, offering state-of-the-art training and showroom facility, where they will be able to see the latest systems in action.

Top-of-the-range, the Reve 3D is the first system to offer Free FOV ranging from 5cm x 5cm to 15cm x 15cm. This further extends the range of diagnostic capabilities and includes various default values for greater operator convenience.

All of the systems are automatically switched to panoramic, cephalometric and CT sensor modes and can be upgraded with a variety of accessories, including high-speed imaging, virtual planning and digital templates. All the units are CE marked and approved for use in the UK.

Trained Engineers • Product Specialists to advise

• Comprehensive bespoke Project Management

Specialist Supplier of Siemens / Sirona equipment.

Impeded accessibility of the cavity

If the cavity is not accessible with the curing light or if chemically compatible cements are used, the dual-curing ExciTE F DSC (Dual cure Single Component) is indicated. ExciTE F DSC is available in single-dose vials in two sizes: Regular for normal preparations and Small for micro-cavities and endodontic applications. A delivery system allows you to speak to your local Ivoclar Vivadent Product Specialist for more information.

Contact: Ivoclar Vivadent Ltd, Ground Floor, Compass Building, Feldspar Close, Cinderford, GL14 2JE. Tel 0118 924 7880

The expression of form and function

Offering high quality instruments and technologically advanced clinical equipment doesn’t present Castellini from Faenza. They believe in the development of some of the most visually stunning apparatus.

With a passion for finding elegant solutions, new demands of today’s dental profession, Castellini has created a range of units to meet the most exacting standards.

The contemporary designs and stylish appearance encompass comfort and practicability, with a suite of advanced instruments designed to be right where a practitioner needs them to be.

For anyone considering a refurbishment of their current, outdated clinical space, this will mean choosing the product that suits your particular practice’s needs. The ExciTE F and ExciTE F DSC are fluoride-releasing composites for use in teeth that are particularly sensitive to fluoride.

Choice of the product to use depends on whether or not the curing light will be able to cure the adhesive.

The light-curing adhesive ExciTE F is used in clinical cases where the exposure to the curing light is ensured, for instance in direct restorative procedures. The light-curing adhesive ExciTE F is used in clinical cases where the exposure to the curing light is ensured, for instance in direct restorative procedures.
