Highline

Highline bespoke healthcare storage solutions, from Support Chairs, are the ultimate answer in mobile storage systems. There Orthodontic Trolleys incorporate a variety of features designed to make Orthodontic Treatment even easier and more efficient.

Composed of modules, containing sets of 4 different drawer sizes, they can be combined in one of nine models to create units of the required height, width and mixture of drawer sizes. Some models feature an open space for storing equipment etc or a glass fronted lockable cupboard with a height adjustable shelf.

Stylish and efficient, Highline Orthodontic Trolleys are constructed from aluminium, steel and high quality plastics, which are resistant to most stains including blood. Drawer fronts are available in either simulated aluminium or navy metallic finish.

For further information contact Support Chairs on 01296 581764, fax 01296 586585, email sales@supportstool.co.uk or visit www.supportstool.co.uk.

New Sirona XIOS sensors generate introral images in just a few seconds

The new Sirona XIOS sensors combine the advantages of digital X-ray and cutting-edge imaging technology. “Digital X-ray speeds up the examination process, reduces radiation doses and delivers more precise diagnostic information,” exclaims Kerstin Buchner, Product Manager of the Sirona Imaging Systems Division. “The Sirona XIOS is a fully digital sensor system that generates X-ray images practically in real time and thus speeds up and simplifies treatment workflow. Thanks to their slimline design and rounded edges, the sensors are easy to place in the patient’s mouth.”

The flat cable exit on the rear of the sensor likewise facilitates the easy positioning of the sensor.

Regular Care for your Handpieces!

Correct and regular maintenance is the key to prolonging the life of your valuable instruments and considerably reducing your repair costs. NSK’s Care+ Plus is a simple and reliable way to care for all your high and low speed handpieces.

At the touch of a button, Care+ Plus automatically cleans and lubricates up to 5 instruments, at one time, in less than 2 minutes, ensuring superb handpiece performance is maintained at all times. Featuring a unique rotational maintenance system, Care+ Plus ensures all low speed handpieces rotate continuously throughout the cleaning process, guaranteeing that maintenance solution is delivered to even the hardest to reach parts of the handpiece.

Take care of all your handpieces with NSK’s Care+ Plus. For more information please contact Jane White at NSK on 0800 6541909 or your preferred dental supplier.

Have you heard about NSK Adva-Taste? Benefit from huge savings of up to 40% on high street brands with NSK’s new customer benefit scheme. For more information visit www.peoplevalue.co.uk/nsk-advantage.

Orthospace Interproximal Reduction System

Attention Aligners Users! If you are using aligner appliances then the Orthospace Interproximal Reduction System is the system for you.

Today, retainer type appliances are more popular than ever. The Orthospace Interproximal Reduction System makes creating the required spaces for this type of treatment easy and efficient.

Orthospace is a thin flexible interproximal tool, which facilitates the re-contouring of enamel and many types of dental materials. It also enables re-duction of the interproximal tooth structure correcting the inadequate space, caused by an insufficient arch length.

The kit comprises of 1 x Handpiece EVA System, 1 x Extractor, 1 pack of Files 7 pieces, 1 set of Wedges, 1 set of Measuring Gauges (12 pieces) & 1 x Tweezers for Wedges.

The Dental Directory is offering the Orthospace Kit at £595.00 and until end of June, buy the Kit and receive a pack of 7 Files free, worth £159.05.

For more information call The Dental Directory on 01576 591 291.

Tricky Situation ... not with Starflow!

Permanent retention is increasingly being recommended as the only way to ensure long-term stability of orthodontic treatment and more and more dentists have found that Starflow from Danville Materials is the perfect solution to bond lingual or labial permanent wire retention.

NSK’s powerful Surgic XT Plus is a surgical micromotor ideal for placement of mini implants often used in complex orthodontic treatment. Used primarily in conventional implant procedures, the Surgic XT Plus combines accuracy, speed, torque and control.

With a growing reputation in surgical applications, the Surgic XT Plus brings a new dimension of control through NSK’s innovative and unique Advanced Torque Calibration (ATC), the highest compressive strength of any flowable composite available, so it’s unlikely to break or shear once placed.

To bond your retainers with confidence please contact Ex-ident on FreeCall 0500 521111 or visit www.evident.co.uk.

Ergonomically designed for optimum comfort!

Support Stools, from Support Chairs, are the product of world class Swedish furniture design by Bruno Mathsson. They have been developed for professions working in sedentary positions, where both body support and the ability to move freely are essential. The seat and back of the Support Stool is designed to take the weight off the incumbent’s back and provide maximum comfort. The fully adjustable back support and bowl-shaped seat ensuring a proper posture.

Oral Relief Gel (does NOT contain Choline Salicylate!)

Ortho-Care (UK) Ltd, has launched its long awaited and highly requested Oral Relief Gel. It has been specifically formulated for dental professionals and dental patients.
with analgesic properties to relieve pain and help reduce inflammation. Its antibiotic properties make it effective against the bacteria that cause brown stains in the mouth. The Gel is pleasant tasting as well as being mild when applied to the affected area. Great news especially for the younger patient!

Oral Relief Gel is available in over the counter display units containing 12 handy sized tubes.

For information call Customer Services on 01274 800174 Email info@orthocare.co.uk or visit the website www.orthocare.co.uk

New and Improved

NSK’s Prophyl-Mate neo is a reliable and user-friendly air polishing system and is the perfect instrument for orthodontists to effectively clean and polish before bond-up, during treatment when changing arch wires and after de-bonding.

Thanks to its original de-tachable 560 front-end swivel connection and newly introduced selectable 60° and 60° tips, this compact, lightweight system now delivers greater polishing power directly onto the tooth surface. An all-round tooth polishing system, Prophy-Mate neo can clean all kinds of teeth, re-move stains and polish teeth af-ter de-bonding making these routine procedures easier and more efficient than ever before.

A24/7 Client Legal Helpline is also available, providing access to a dedicated call centre team of legal consultants, barristers, solicitors and legal executives.

For more information call Professional Fee Protection on 0845 597 1177 or email info@pfp.com or visit www.pfponline.com

Sirona Dental Systems are pleased to invite you to attend a live demonstration of the revolu-tionary CEREC chairside sys-tem at a local practice near you.

This will give you the perfect opportunity to see the CEREC Sys-tem in action, with a live demon-stration, carried out by a local practitioner, without obligation.

The first CEREC System was introduced over 20 years ago, and is now accepted proven technology. The CEREC system is constantly evolving and pro-gressing as the most innovative chairside restoration system in the market place today.

CEREC is clinically proven; it offers superbly aesthetic, long term and durable restorations for your patients in a single visit whilst also generating outstanding extra income for your dental practice.

Take the plunge and call Sirona Dental Systems on 0845 671 5040 for details of a live demonstration close to you.

Sirona – the dentist’s choice for CEREC

Well Done to Marathon Man Dr Alfie Chan

On Sunday the 28th of March 2009, Dr Alfie Chan joined 10,000 fellow runners to tackle the Reading Half Marathon, raising money for Cancer Research in the process and finishing the event in the excellent time of 2 hours and 12 minutes!

A loyal client of Dental Business Solutions (DBS), the UK’s leading consultancy and ac-countancy firm, providing a range of services to dental professionals, Dr Chan crossed the entire race wearing the colours of the company, with the name of DBS Partner George Manolescue, who has recently been diagnosed with Hodgkins Lymphoma.

For more information please contact Anne Evans at AEvans4@its.jnj.com.

Effective Periodontal Healing With Chlo-Site Gel

Chlo-Site Gel provides clinicians with a straightforward and non-surgical periodontal healing aid. The round-tip need-lelets the clinician apply Chlo-Site to the deepest part of peri-odontal pockets while the inno-vative design minimises trauma to the surrounding tissue.

Chlo-Site is a unique type of Xanthan gel, containing a 1.5% concentration of Chlorhexi-dine, formulated as one third fast releasing diclohexanon and two thirds slow releasing dihydrochloride. This enables the Xanthan gum to retain its micro-biological integrity, and the chlorhexidine also acts as a gel contamination-free for 15 days.

Effective periodontal healing is achieved by the mucosal-adhesive proper-ties of Xanthan material, which Chlo-Site adheres to mucosal tissue, forming a sterile barrier to com-bat bacteria.

Of particular use as an ad-junctive in the management of periodontal and peri-implant pocket management, Chlo-Site does not induce bacterial resist-ance.

Chlo-Site Gel is supplied in ready to use disposable sy-ringes, and is available from Oraldent, the leading oral care speci-alist in the UK:

For further information on Chlo-Site from Oraldent, please contact 01480 862080.

Preparation with Mrs. Hi-D® Diamond Burs

Mrs. Hi-D® is well-re-spected - with her years of expe-rience, she is a key asset to the team. Her unrivalled experience in the ad-imal grit mean that she is re-liable & durable and always runs true. She ensures most clinical situations are met with her various patterns and she’s always kind to your handpieces.

DENTSPF’s Indirect Restora-tive Team understand that crown & bridge restorations are amongst the most demanding procedures carried out by a dentist, with high expectations from their patients. DENTSPF’s quality, branded products, such as Hi-D Diamond Burs, fit each step of this proce-dure, making it quicker and easier
Now in convenient SingleDose blisters

Futurabond M

High adhesion values on enamel and dentine, quick and simple application as an all-in-one and one-step adhesive as well as high tolerance to moisture - these are the properties that distinguish Futurabond M. The new adhesive from VOOCO is a nano-particle reinforced, light-curing, one-component, self-etch bond for building a durable, adhesive bond with excellent marginal integrity between tooth substance and restorative.

Convenient and hygienic SingleDose

Futurabond M now also comes in the convenient and hygienic SingleDose blisters. This unit dose delivery system is simply opened with the applicator, and the bond is ready for application. One coat is sufficient: this shortens the entire bonding process to only 35 seconds. The blister is gas-tight and does not have to be shaken. This system greatly facilitates cross-in-fec tion control procedures in the dental clinic.

Manufacturer: VOOCO GmbH, PO Box 767, 27457 Cuxhaven, Germany, www.vooco.com

For more information contact Tim McCarthy, Mobile: 07500-709-615, or email t.mccarthy@vooco.com

Help Patients Keep Teeth And Gums Healthy, Wherever They Are

Surgery professionals appreciate the versatility of PracticeSafe spray. Not only can it disinfect the alcohol resistant surfaces of a Dental Practice but medical products such as hand and angle pieces can be cleansed and disinfect to a very high standard.

PracticeSafe disinfectant spray is alcohol based and highly effective against MRSA/HBV/HIV/AIDS, HIV/BVDV, vaccinia, tuberculosis, hospitalism prophy laxis, bacteroidal, fungoidal.

This highly effective spray is available in a choice fragrance. Dentists, hygienists and dental nurses can choose a disinfectant spray with an odour to suit their mood! It is available in neutral, lemon, fruit and flower fragrances.

To take advantage of this excellent special offer ring Jackie or Helen on 01793 770256 or visit our website www.kemdent.co.uk

Genus

Genus Group has built its outstanding reputation on quality, reliable construction and refurbishment. A family-run company with a focus on teamwork and communication, Genus enables clients to realise their vision, guiding the project from planning through to completion.

For example, the most cost effective option, Dentomycin, has several beneficial actions. It combats the wide range of harmful bacteria thought to be prevalent in periodontal disease, and is also a highly effective anti-inflammatory. It enables the clinician to reach areas that are hard to access with instruments alone, and attacks the acidic, destructive enzymes produced by bacteria. This leading adhesive can also reduce pocket depths by up to 42% over 12 weeks when combined with scaling and root planning.

For more information please contact John.Jesshop@blackwell-supplies.co.uk or email john.jesshop@blackwell-supplies.co.uk

2 Buy Practice-safe sprays and receive a 20% discount

With the EyeMag Pro, you experience impressive depth of field, expansive view and stereo vision - these are the properties that distinguish Futurabond M. The new adhesive from VOOCO is a nano-particle reinforced, light-curing, one-component, self-etch bond for building a durable, adhesive bond with excellent marginal integrity between tooth substance and restorative.

ADJUNCTIVE THERAPIES AND THE FIGHT AGAINST PERIODONTITIS

Adjuvant treatments doubtlessly have an essential role. When used from the outset in combination with scaling and root planing, they provide the most effective means of ensuring good results and patient satisfaction in the treatment of periodontal disease.

For example, the most cost effective option, Dentomycin, has several beneficial actions. It combats the wide range of harmful bacteria thought to be prevalent in periodontal disease, and is also a highly effective anti-inflammatory. It enables the clinician to reach areas that are hard to access with instruments alone, and attacks the acidic, destructive enzymes produced by bacteria. The new and improved DUO caters for every working need and each unique feature is controlled upon the latest in technology and design to create a highly efficient and immaculately designed system to suit all dental practices.

A substantial number of delegates who attended the first seminars hosted by the company felt the courses proved invaluable in relation to important aesthetic dentistry topics. Developed to help further strengthen the skills of dental teams by enabling dental practitioners to achieve greater client care and long-term success individually, the courses will continue to run throughout the year at various locations.

Hands on tutorials enabled participants to evaluate and test the vast selection of Ivoclar Vivadent products that are relevant to implement these strategies.

For more information on other seminars being run by Ivoclar Vivadent please call 0116 284 7880.

Amaris Gingiva

For the highest standards in aesthetic dentistry, Amaris Gingiva is the only restorative that permits chairside gingival shade matching. This new gingiva-shaded, composite-based restoration system facilitates individual shade-matching using a combination of a base shade (nature) with three mixable opaque shades in white, light and dark. The result is a representation of the gingiva that appears natural.

Through this principle, behind which the proven Amaris-know how stands, extensively exposed dental areas caused by gingival recession and wedge-shaped defects in the cervical area can be controlled in the future, both functionally and aesthetically. With Amaris Gingiva, the high standard placed on the capacity of the restoration possesses no longer has to end at the cervical boundary. This new material permits the reconstruction of the "white" boundary with a predictable result.

Mr Artio™ "Tools for a True Artist"

Mr. Artio – he is so light and agile with an ergonomic grip and super strong tips, the grip and super strong tips, the new style (front adjusting) handpiece as the new style (front adjusting) handpieces! The new fibre works with both the old style (back adjusting) and is a revolutionary way of improving the efficiency, profitability and digital imaging capabilities of your practice.

Mr Artio™ – he is so light and agile with an ergonomic grip and super strong tips, the DENTSPLY team often wonder how they would cope without him. He simply loves creating works of art with his DENTSPLY restorative friends!

DENTSPLY’s Indirect Restorative Team understand that crown & bridge restorations are amongst the most demanding procedures carried out by a dentist, with high expectations from their patients. DENTSPLY’s quality, branded products fit each step of this procedure, making it quicker and easier to ensure a perfect, long lasting restoration and help you to “get it right first time”.

Restorative Hand Instruments with Mr Artio™ “Tools for a True Artist”

OpusDent support

Velopex are delighted to announce that their new Velopex Laser Fibre Tips work perfectly with the Opus 5 and Opus 10 Dental Diode Lasers. These 520 micron flexible fibres are sheathed in a white plastic outer. These fibres work superbly with either the Velopex Classic, or Colour, Diode Laser models.

Teamed with regular brushing, the Waterpik® has seen amazing survey results including a significant reduction in gingival bleeding (up to 95%) and a reduction in gingivitis compared to regular brushing and flossing (up to 52%).

The biggest problem with periodontal pockets is daily cleaning, but using the Waterpik® dental water jet with a Pik Pocket™ subgingival delivery tip will allow easy and gentle deep cleaning, even for pockets of up to 6mm.

For your professional courtesy discount on the Waterpik® Dental Water Jets speak to your wholesaler or visit www.waterpik.co.uk. The product is also widely available in Boots stores.

Pandent HurriSeal

The product is the same as we have had in the past two year expiration date, the reason we have two years on it is because all new products have to go on stability before they can justify their expiration date whenever any changes are made, in this case with the container. The product passed an accelerated three month which justifies a two year expiration and it’s currently in the midst of an accelerated six months to justify the three year expiration. The next batch will have three years on it, this batch however won’t be manufactured till August.

Eliminate Bad Breath

Peripropur specialises in premium oral hygiene products, incorporating the latest technology.

RetarDEX Oral Rinse, Spray and Toothpaste, are highly effective, well-researched and clinically proven oral health care products. The active ingredient, in this range chemically degrades odour-causing volatile sulphur compounds (VSC) on contact, thus eliminating, not masking, bad breath. It is a highly effective dental germicide and plaque retardant. RetarDEX Oral Rinse and spray are free from alcohol and pH balanced. Whilst RetarDEX Toothpaste is non-foaming as it does not contain sodium lauryl sulphate (SLS).

As part of our commitment to Fresh Breath Clinics we have produced a Fresh Breath Kit and a ‘How to set up a Fresh Breath Clinic Manual’ available with the purchase of the kits.

For further information please contact Peripropur Ltd, Tel: 020 8888 1500 Fax: 020 8888 9011, E: Mail sales@peripropur.co.uk
