Nobel Biocare – Solutions Guaranteed

It is certainly true that patients are becoming increasingly knowledgeable and demanding with regard to the dental treatment they receive. As a result of this, when a patient is faced with extraction, dentists are often offered as an alternative option. Instead, implants represent a more cost-effective and functional long-term solution. In providing the perceived complexity and high treatment cost that block the way of delivering the patient’s expectations, Nobel Biocare has developed a unique implant that ensures excellent initial stability, a highly desirable trait in both immediate placement and lesser bone quality situations.

S4S announces Bruxism Awareness Week at WAC 2010

S4S was delighted to announce at this year’s World Athletic Congress dates for the first ever Bruxism Awareness Week which will be held from the 25th to the 31st October 2010. This is part of the development to the dental press, S4S gave details of the seven-day event, which is being backed by Dentistry in the United Kingdom, Genus and Nobel Biocare; and explained the importance of focusing national attention on this potentially debilitating condition. Bruxism Awareness Week will also aim to highlight where sufferers can seek help.

As part of the awareness campaign, S4S will be making a donation of £1 to the Hodge Hope Charity, for every call made from the start of the awareness week until 31st December. Statistics indicate that a staggering one in two people will experience the condition at some point of their life; therefore, there is a need for conventional layering.

The S4S Bruxism Awareness Week is a fantastic opportunity for dentists to educate their patients on the condition, and help them to feel more confident when engaging with their patients. The week will be supported by a range of dental products and equipment made by Genus, as well as from the other companies involved. By transforming dentists’ perception and dispelling old myths about the condition, S4S will enable dentists to engage with their patients more effectively, achieve the best possible outcomes for patients and help to improve overall oral health.

S4S is delighted to be able to support the awareness campaign, and assist dentists in providing the best possible care for their patients.

The Cosmetic Dentistry Guide Make your voice heard in 2010

With more cosmetic dentistry options than ever before, it is vital that your practice stands out above the rest, and not just because of the clinical outcomes. The UK’s leading website for cosmetic dentistry information, the Cosmetic Dentistry Guide, is a must-visit for any patients considering treatment, and contains hundreds of pages of information. It is the perfect place to market and enhance your practice.

The Cosmetic Dentistry Guide is a vital resource for cosmetic dentists and patients alike.

For more information, visit www.cosmeticdentistryguide.com

Dr. Feran is so confident in his ability as an implant dentistry specialist that he offers 10 years of warranty for all implants. This is unique in the UK. While many other dental practices may offer warranties, these are generally limited to 2 years. By choosing Dr. Feran’s services, patients can have peace of mind knowing that their implants will last for a decade or more. Additionally, Dr. Feran is a member of several reputable implant dental organizations, giving patients the assurance that they are receiving top-quality care. Visit his website to learn more about his services and qualifications.
These products should be used for daily disinfection of surfaces. ChairSafe foam and wipes are alcohol free. They are effective against HBV/HAV/HEV, HCV, H1N1, and the novel coronavirus (SARS-CoV-2). ChairSafe disinfectant foam cleaner is available in 200ml bottles and 1L and 5L refill containers. ChairSafe foam and wipes are alcohol-free. For use in hospital rooms, HTM 01-05 from October 2018, has introduced a new category of site equipment, “secondary site equipment surveys, installation and in-depth training to help dental professionals deliver the very best in their fields and enjoy the benefits immediately. The Nazura team is able to adapt with the practicioner’s need for alcohol-free dentifrice products such as Corsodyl Continuous.
