IPS e.max Bleach Shades for all-ceramic perfection

The IPS e.max system from Ivoclar Vivadent enables the Laboratory provision of beautiful all-ceramic restorations in an extensive range of indications, including crowns, bridges and veneers. This unique & simple system allows the restoration to be made using CAD/CAM technology or press technology. Wherever the option is chosen, they offer enhanced aesthetics and biocompatibility compared with metal-ceramic restorations, and many believe this to be the best restorative solution for strength, aesthetics and minimally invasive preparation.

The IPS e.max system offers a choice of either lithium disilicate glass ceramic and fluorapatite glass ceramic blocks for pressing or zirconium oxide and lithium disilicate glass ceramic for CAD/CAM technology.

For further details contact Sient Dental Systems on 01932 582900 or email info@sient.co.uk.

Banish Tooth Whitening Sensitivity

Sensitivity is often an issue associated with Tooth Whitening, which applies to both home and power (surgery) whitening procedures.

GC has introduced Tooth Mousse that is the perfect addition to your usual tooth whitening treatments. Apply immediately after tooth whitening to relieve sensitivity caused by dehydration in the tooth or provide your patients with a tube to take home with their home whitening kit.

GC Tooth Mousse is water based, sugar free topical cream that contains Recaldent® CPP-ACP (Garsin Phosphopeptide – Amorphous Calcium Phosphate). This topical paste will provide extra protection for the patients’ teeth. It has been shown that the twice daily use of 1% CPP-ACP solution produced a 90% reduction in enamel demineralisation (Redin, 1988).

When CPP-ACP is applied to the tooth surfaces, it binds to biofilms, plaque, bacteria, hydroxyapatite and surrounding soft tissue localising bio-available calcium and phosphate. Saliva also enhances the effectiveness of CPP-ACP and the flavour of the tooth mousse helps to stimulate saliva flow. The longer CPP-ACP is maintained in the mouth, the more effective the result.

There is a wide range of benefits for GC Tooth Mousse. It can be used to provide protection for teeth and to help neutralise an acidic oral environment. Additional professional applications of the mousse will be immediately following bleaching, after ultrasonic, hand scaling or root planing, after removal of orthodontic brackets, following professional tooth cleaning, after apical treatments and also to provide a topical coating for patients suffering from erosion, cavities and conditions arising from xerostomia.

To provide a variety of choices for individual patients, GC Tooth Mousse is available in 5 different flavours – namely, Strawberry, Melon, Vanilla, Mint and Tutti Frutti.

For further information please contact GC UK on (0044) 1908 218993 or e-mail info@uk.gceurop.com.

Dentist Tooth whitening Systems

Dentist stocks a range of reasonably priced tooth whitening products for in surgery or at home use.

Blue lightening® 40 is an in surgery premixed gel system with an orange tint to aid placement. The hydrogen peroxide gel is only activated when expressed from the tube. Kit also contains gingival barrier and silky touch lip cream.

Blue lightening Home is an at home kit containing high stability gel, that is only activated by saliva. The Peroxide therefore does not break down before use, as it is passive. It does not contain caries-inhibiting agents or cause irritation. pH neutral. Each kit contains neutral, antiallergenic, odorless vacuum sheert not a vinyl-acetate based vacuum sheet.

cool kiss 50 in surgery kits. For professionals who prefer to mix the whitening paste how they prefer. These are bulk treatment kits for 15 or 50 applications, that includes a-silicone self curing gingival protection.

Mini cool blue light system is face mounted. Ultra light weight weighing only 75g. It clips onto check retractor, is comfortable for patient, effective, easy to use, and features a time totaliser and key lock to prevent unauthorised use.

VivaStyle

The Complete Serious Whitening System

Utilising carbamide peroxide oxygen releasing agents the Vi

VivaStyle range has a gentle, but effective action on tooth structure. It is available in various concentrations of two basic presentations – VivaStyle and VivaStyle Paint On Plus - each designed with a different application in mind.

VivaStyle gel is applied ( according to a Dentist’s instructions ) by the patient at home, for an hour or longer per day, using an individually customised tray. It is available with either 10% or 16% carbamide peroxide content.

VivaStyle Paint On Plus is recommended for patients if they don’t want or can’t afford fitted trays. Applied by brush, the varnish remains on the teeth for 10 minutes before being removed with a toothbrush. This procedure is normally performed twice daily for 7 days. It can be used to whiten the complete den-
