Philips savers live too

Philips is a diversified health and well-being company which is focused on improving people’s lives through its consumer products - from SoniCare toothbrushes to Zoom tooth whitening - and medical and professional products, including the world’s leading defibrillators. Its award winning HeartStart Defibrillators are now being made available directly to dental practices to enable anyone in the team to treat an emergency.

Simply email: phillippa.goodwin@7connections.com to help make sure the business reaches its full potential, “she says.

The new dental systems have been designed with two key features in mind - to make it easier for patients to book and pay for their visits and to ensure the practice’s patient files.

Thankfully, Principal Dentist Daniel Hopkins and his team use CS R4 Online Backup and Recovery - an automatic, highly encrypted online backup system designed for just this situation. “I’m really glad we had online backup” says Daniel “All our patient records, including all the patient information, are now backed-up.”

“Helped Daniel and his team get Half Moon Dental Centre up and running,” he is often filmed in his dressing room with a SoniCare in the background. Join the fan club.

A new era in toothbrushing has begun with the innovative Philips Sonicare DiamondClean Black. The winner, Steve McDaniel of Riverside Dental in Chester, will be running off a track nearby for an adrenaline-fueled experience. The winner will be flown delivered to a practice every month for a year won by Sarah Galbraith on behalf of Central Dental in Derby who are looking forward to their first delivery this week. If you would like to learn more about the latest innovation from Philips please telephone 0800 5567 222.

EndoCare – support when you need it

At EndoCare we bring together a leading group of experienced Endodontists, newly trained and available to assist you and your patients with all aspects of this complex specialty. We work closely with you to ensure we have all the support you need. Our Endodontists are experts in their field, but they are also all warm, friendly and compassionate individuals, and will do all to support your patients and give them the best experience possible. Our advice on all aspects of Endodontics and patient care. Our team of experienced Endodontists are not only experts in their field, but they are also all warm, friendly and compassionate individuals, and will do all to support your patients and give them the best experience possible.

“Having become very comfortable with the standard of service RPA’s dental office, we were more than happy to work with them to redesign and refurbish our surgeries. “During the initial design stages, we were particularly impressed that RPA Dental discussed the project with several members of our practice team, not just the dentist, and this resulted in a much improved design. Their team’s knowledge and understanding of best practice in the industry was very apparent – they provided practical advice on material quality, colour schemes and relevant clinical advances.”

DMG UK

See the Linda Greenwall video on DMG UK’s website

Icon is DMG’s revolutionary treatment for incipient caries and carious white spots. This is a world first – an invasive treatment that is non-invasive, clinically proven and easy to use. DMG's unique innovation is the only solution for incipient caries and carious white spots that eliminates a trip to the dentist. Icon is a caries-inhibitory flowable composite. It self-etches and adheres to all tooth surfaces. The patient can carry on as normal straight away, and will not need to return for any further treatment. 

For further information please contact DMG UK: 01565 794941, fax 01565 360100, email paula@dmg-dental.co.uk or visit www.dmghome.co.uk

DMG’s NEW self-etching and adhesive flowable composite is ideal for dental aesthetics!

With their requisite tooth tone and shorter chair time, patients are more likely to attend for regular preventive care. Therefore a self-etching and adhesive flowable composite that eliminates both the etching and bonding steps and the associated time expenditure is a real advantage. DMG’s new self-etching and adhesive flowable composite solves this problem and saves valuable time too. Post-operative sensitivity is also markedly reduced. Comis is faster, easier, more gentle and reliable! This new DMG Comis self-etching and adhesive flowable composite is ideal for dental aesthetics!

At The Dentistry Show 2014

At the Dentistry Show 2014, the show which every dental professional attends, DMG’s range of products will be on display in hall 10, stand 10.32 and stand 10.33. DMG’s products are easy to use and appear to meet the needs of dental professionals in terms of esthetics and patient satisfaction. DMG’s products are easy to use and appear to meet the needs of dental professionals in terms of esthetics and patient satisfaction.
