BioHorizons presents its European Symposium

BioHorizons invites you to join an international group of well respected speakers for its European Symposium on Rome between 18 and 20 October 2012.

Addressing a wide range of dental implant topics including implant aesthetics, implant complications and tissue regeneration, the symposium presents the perfect opportunity to stay on top of the latest treatment options and remain aware of what techniques and products are supported by peer-reviewed research.

The event will include presentations from Carl Misch, Michael Piros, Jack Ricci, Sonia Loepf and Brian Miller.

Also, expanding on previous event offerings, the 2012 schedule incorporates a biologically focused forum on the Thursday afternoon (19 October).

To find out more about this exciting event, including details of the topics to be covered, please visit www.biohorizons.com/symposium-symposium-Italy-2012.aspx.

For further details about BioHorizons, a company dedicated to developing evidence-based and scientifically proven products, visit www.biohorizons.com, call 01344 752560 or email info@biohorizons.com.

Sonia Leziy and Brahm Miller.

The Waterpik Water Flosser – A great way to succeed with Spry Xylitol Toothpaste

Waterpik® International is proud to announce the UK launch of its Water Flosser – a device that uses powerful water pulses to clean between teeth.

Brush to success with Spry Xylitol Toothpaste

Since it was first introduced as a key ingredient in toothpaste in the mid-1970s, Xylitol has been one of the most important weapons in the fight against dental decay. But while the carbohydrates in sugary foods and drinks have long signified supreme in preventive dentistry, there is another name garnering support from dentists across the world – Xylitol.

Xylitol is a white crystalline sugar alcohol sweetener that looks and tastes just like sugar, and it’s generally considered safe. Thanks to its unique composition, the sugar in xylitol cannot be metabolised by the bacteria that normally reside in the mouth, and thus it is resistant to plaque formation.

To take advantage of xylitol’s unique properties, leading producer of natural Spry manufactures a range of xylitol-based oral hygiene products including Spry Dental Floss and Spry Toothpaste with xylitol.

Each tube of Spry Toothpaste is made with all-natural xylitol and is designed to leave teeth feeling clean, smooth and extra fresh. With a variety of flavours including Spearmint, Peppermint and now also Cinnamon, Spry Toothpaste gives dental professionals a new weapon in the war on dental plaque and is available both with and without fluorides.

Innovative digital imaging solutions from Carestream Dental

With a reputation for innovation in digital imaging for the dental profession, Carestream Dental has been inextricably linked with the Kodak brand since 1999.

A lightweight, ergonomically designed camera, the Kodak 1500 camera offers dental practitioners unparalleled flexibility and efficiency, thanks to its pioneering liquid lens technology.

Focusing like the human eye, the Kodak 1500 camera captures high-resolution images and video with undistorted light reflection eliminated by the automatic adjustment to lighting conditions. The user can take still portraits, full arch, intraoral and macro views with LEDs for optimal illumination of even the hardest to see areas. The Kodak 1500 camera also utilises the latest HD technology for improved freedom of movement around the chair: it also allows for ease of sharing with other clinicians, achieving efficient workflow. The information can be directly transferred and displayed on either a computer or video monitor, making patient interaction more dynamic. For more information please call Carestream Dental on 0800 169 9002 or visit www.practiceworksystems.co.uk

For more information on Waterpik® Water Flossers please speak to your wholesaler on 0800 169 9002 or visit www.waterpik.co.uk. Waterpik® products are widely available in Boots stores.

The Dentistry Show 2013: New Chair for the Dental Nursing Conference announced

The Dentistry Show is pleased to announce the new Chair for the Dental Nursing Conference 2013. Laura Horton, from Laura Horton Consulting Ltd, works with dental teams across the country. Ex-Director of the Dentistry Show, Chris Brown, is highly enthusiastic about the new appointment.

“Having Laura host the Dental Nurses Theatre at The Dentistry Show 2013 is a huge coup for us,” said Chris Brown. Her career began as dental nurse in 1996 – this has led her to become one of the most sought after FDO advisors around and her enthusiasm for helping dental practices is incomparable. I’m sure the two days of presentations that Laura will be delivering as well as introducing some hugely inspirational case studies will mean, again, that the theatre is standing room only.”

The programme for the Dentistry Show 2013 will be announced in the coming months, with the dates in your diary now and make sure the dental nurses in your team don’t miss Laura and a host of inspirational speakers covering all aspects of clinical practice on the Dentistry Show 2013.

For more information contact Ray Goodman on 0151 707 0390 or email rayg@goodmanlegal.co.uk or visit www.goodmanlegal.co.uk.
