Dr Helen Harrison of Granta Dental, Cambridge, says: “For my new practice of your dreams.

The launch of the revolutionary powder-free CEREC® system from Ceramic Systems, The CEREC® System is a simple, efficient and easy to use, CEREC® System is a computer-aided method for creating precision restorations in all dental situations. With CEREC, the CEREC® System enables continuous data acquisition for the formation of CEREC 3D virtual models of single teeth or all the teeth in full arch, however, it saves time and energy and the inconvenience associated with the impressioning stage. Simply by sweeping the device over the patient’s teeth, it takes full color and 3D virtual models, which can be used to counsel patients to create the deviation for additional treatment or promotion of oral health. As usual we have launched our new ‘My Happy Teeth’ campaign – a programme of engagement and education designed to encourage children to take an active interest in their teeth and oral care.

Stern Weber dental units are the Smart Choice for modern dental practices. All Weber units provide exceptional patient comfort and outstanding functionality. Stern Weber units also feature an ergonomically efficient design for superior comfort. The highly manoeuvrable dentist and assistant modules provide a vast array of essential instruments and specific options for your practice, and your patients’ requirements. With an almost unlimited combination of practical instrumentation options, Stern Weber units offer a comprehensive solution to any chairside requirements.

We were really glad that we brought Clark Dental in at an early stage in the project as they became an integral part of our team. They liaised with David our appointed architect through many problems we were having to get involved. They then did all the shifting of the equipment from the old practice as well as the installation of the new equipment. It was all immensely well planned and executed, they delivered what they promised, when they promised – invaluable!”

For more information call Clark Dental on 01268 733 146, email info@clarkdental.co.uk or visit www.clarkdental.co.uk

Endodontic referrals – believe in something better

EndoCare – we believe in something better. Our team of Specialist Endodontists all have highly qualified and passivated advanced qualification standards of treatment to all our patients. Because we focus exclusively on EndoCare, all our practices are equipped to the highest standard to deal with even the most complex of cases.

By its very nature, Endodontic treatment can be a stressful, yet do and assistive activity for all parties involved. That’s why EndoCare has set out a daily treatment plan schedule due to the confidential nature of the work. By referring to EndoCare you can ensure that your time - consuming and stressful activity is likely, and always you can be kept up to date by ensuring every stage of the treatment process. We will always keep you informed as much as possible throughout treatment.

We will also recommend any necessary follow-up treatments and will help you to discuss these, offer help and give advice on all aspects of Endodontics and patient care.

The British Society of Periodontology recently recommended EndoCare to its membership from more than 400 colleagues who have already signed up to CPD to today.

Centre for Dentistry launches “My Happy Teeth” campaign

At Centre for Dentistry, we’re passionate about promoting oral health. As such we’ve launched our brand new ‘My Happy Teeth’ interactive sessions in each dental centre to discuss topics including diet and drink, how teeth are made, how to brush and floss, and other interesting aspects of self-care.

The launch of the revolutionary powder-free CEREC® system from Ceramic Systems, The CEREC® System enables continuous data acquisition for the formation of CEREC 3D virtual models of single teeth or all the teeth in full arch, however, it saves time and energy and the inconvenience associated with the impressioning stage. Simply by sweeping the device over the patient’s teeth, it takes full color and 3D virtual models, which can be used to counsel patients to create the deviation for additional treatment or promotion of oral health. As usual we have launched our new ‘My Happy Teeth’ campaign – a programme of engagement and education designed to encourage children to take an active interest in their teeth and oral care.

The London Smile Clinic: Orthodontics Experts

Ensure your patients receive award-winning treatment by referring them to The London Smile Clinic. The practice's Orthodontists Team is led by Dr Priya Bhopal, who is listed in the GDC's Specialist Register and has followed the highest possible standards of training in orthodontics in the UK.

The London Smile Clinic offers bespoke one-to-one smile design and uses the highest rated, tried and tested technology, materials and techniques available anywhere in the world today.

Orthodontics options include the Invisalign Aligner, Invisalign lingual brackets for those wishing their treatment to be discreet, and fixed appliance treatment. The clinic also offers a comprehensive range of affordable retainers.

A highly skilled team of cosmetic dentists, all of whom have considerable experience in the field, offer a first class service to every patient. With an ethos of minimal invasive dentistry that achieves optimum results, the London Smile Clinic is unique in offering a full range of treatments and the greatest care and attention for your patients.

For more information, please contact 020 7255 2559 or visit www.londonsmileclinic.co.uk/ refer your patients— they will be glad you did!

Nobel Biocare: “take your business forward”

Dr Joe Bhat is a Specialist in Prosthodontics and Oral Surgery and a Fellow of the International Team for Implantology (ITI). He is principal dentist at Moor Park Specialist Dentist Centre in Chertsey, UK. He has worked with Nobel Biocare.

“Nobel Biocare is big enough to handle the requirements of clinicians at different levels” says Dr Bhat. “And yet they have a comprehensive range of protocols that allows them to look after clinicians who have done thousands of implants to people who have just started out. They have a comprehensive product range that is suitable for people at many stages of their careers.”

“One of the most terrifying things that dentists go through when they’re just starting out is the fear of the unknown. They don’t know what they don’t know. There’s a lot of hand-holding involved and that’s just one of the ways in which the Nobel Biocare team offer their support. Dentists have the expertise of a company that implicitly understands the product and offers clinical guidance as a mentor.”

For more information on Nobel Biocare please call 0208 756 3389, or visit www.nobelbiocare.com

Spry Toothgel with xylitol – the perfect way to keep children’s teeth healthy

To help give children the best start possible, recommend Spry Toothgel with xylitol – the perfect way to keep children to oral hygiene and comes in a number of child-friendly flavours to maintain their interest.

Available in a handy 60ml tube, Spry Toothgel is a great way to introduce the ability to proliferate and adhere. This makes xylitol an excellent tool in the fight against tooth decay. Thanks to its unique chemical composition, xylitol can be used to gently massage into gums and teeth or can be used in conjunction with Spry Baby Brush as the ideal introduction to regular brushing.

Watecrain Complete Care – more effective brushing and fluoridation in one Device

The first part of Watecrain Complete Care comprises the brand new Sensronic Professional Plus toothbrush, introducing the highest performance sonic technology for more effective cleaning. Featuring a quadrant indicator and 2 minute timer to ensure thorough cleaning is achieved, the Sensronic Professional Plus can be exchanged conveniently in the Cordless Car seat and is the perfect tool for a comprehensive oral hygiene regime.

Also featured in the new Watecrain Complete Care package is the innovative Watecrain Water Flosser, a device that uses a stream of water pressure and pulsed water, the Watecrain Water Flosser cleans deep between teeth and below the gum-line, removing hard to reach traditional brushing can’t reach. Indeed the product is so effective, the Watecrain Water Flosser has been scientifically proven to remove 99.9% of plaque biofilm after only a 3-second treatment. For complete convenience in a streamlined, single unit, Watecrain Complete Care offers easy and more effective brushing and fluoridation, all in one device.

For more information please speak to your wholesaler or visit www.waterkoi.co.uk, Watecrain products are widely available in Boots stores, Argos and selected Lloyds Pharmacies.

Sirona Specialists, Sident Dental Systems, offer the choice from the complete range of Sirona Treatment Centres, 2D and 3D digital and film-based x-ray apparatus – including the very latest Orthophos XG 3D digital panoramic machine, their extensive range of Sirona handpieces, and auxiliary items including Tsionic SiroLight and SiroStream equipment. Potential clients are invited to visit The Courtyard, Sident’s state-of-the-art training and showroom facility in Chertsey where they will be able to see the complete product range in action. They will then be able to identify the best solution for their individual needs, allowing Sident’s Design Specialists to incorporate their desires into their most appropriate and ergonomically efficient Surgery or Practice layout.

Finally Sident will undertake a complete Project Management Service, including installation and post installation service support, to enable these dreams to become reality.

Waterpik® Complete Care – more effective brushing and fluoridation in one device

The Needle free cosmetic treatment that improves patients smiles and your “bottom line” too!

CRFY’s NEW OXYJet LED De Luxe is the state-of-the-art cosmetic therapy which will delight your patients and Accountant. It is the entirely painless, safe, non-invasive answer to your “bottom line” dilemma. These entirely safe and natural products can be used for either stand-alone skin-care treatments. Mobile and easily moved between Surgeons and Evans-Practitioners, the extremely patient-friendly NEW OXYJet LED De Luxe can be used easily by any member of the Dental Team to deliver their patented pulsed oxygen cosmetic treatments. Compared to £150,000 it will save the Practice to sell over £4,000 00 or more to the “bottom-line”. To supplement the benefits of the NEW OXYJet LED De Luxe, CRFY UK also offer an extensive range of skin-care products, including Beauty Torx and Intact. These entirely safe and natural products can be used for either stand-alone skin-care treatments.

For further information telephone CRFY UK Ltd on 01775 722243, email enquiries@crfy.co.uk or visit www.crfy.co.uk

The demands of legislation including HTM01-05 and the Disability Discrimination Act are incompatible with the challenges of seeking Listed Building Consent, Conservation Area Consent and Planning Permission, he says.

"If you apply for Listed Building Consent to divide up rooms in a classic Georgian or Victorian-Town to fit in a Local Development Order, you are not likely to succeed," says Roger. The whole process becomes unviable and the whole process becomes unviable and the whole process becomes unviable and the whole process becomes unviable.
