Help your patients - ask about their medication

Worried about your patients’ medication could be impacting on their oral health? Research shows that taking three or more drugs means there is around a 50 per cent chance of suffering from dry mouth.

Dental Hygienist Rhianon Jones tackled the subject of ‘Dry mouth and its impact’ in a lecture sponsored by GlaxoSmithKline Consumer Healthcare at the recent British Society of Dental Hygiene & Therapy (BSDHT) Conference and Exhibition in Liverpool.

The Biotine range of products has been specifically developed for patients with dry mouth and can be recommended for daily use. Biotine Oralbalance Saliva Replacement Gel offers long lasting dry mouth relief, soothes and provides lubrication and moisture for dry mouth sufferers.

Wearing high quality loupes and lights is one of the best ways to gain a greater degree of precision and provide patients with a superior level of treatment. Immediately procedures will become easier and less stressful to perform.

Evident, the leading supplier of loupes and lighting in the UK, supply high quality ExamiFlex™ loupes and lights, backed by their highly trained and experienced team, including dispensing opticians. The ONI‘S’loupe is the most advanced of the ExamiFlex™ range. This enables the practitioner to adjust the dioptre to your own prescription.

A loupes-mounted light is the perfect partner and can make a huge difference in achieving the best possible view of the mouth. Perfectly positioned between the practitioner’s eyes, such a system provides light in exactly the right place and direction. With the ExamiFlex™ range, you will not even need to momentarily correct your position, change the angle of your mirror, or move your own outlook.

100 Capsules for the price of 80

Buy 60 Diamond Rapid Set Capsules before the end of February and get 40 Diamond Rapid Set Capsules Free of Charge.

Diamond Rapid Set Capsules are used to perform non-load bearing class I and II restorations, together with procedures for deciduous teeth, tooth preparation techniques and core build-ups. These Capsules are often used for a long term temporary restoration, as the set is rubber, wear resistant to saliva almost immediately. The possibility of any contamination of the tooth surface or light curing. The chemical set renders the material resistant to edge chipping.

Diamond Rapid Set Capsules are “autopolymer” with a chemical set up that adheres to both enamel and dentine without the need for any preparation of the tooth surface or light curing. The chemical set renders the material resistant to saliva almost immediately. The possibility of any contamination of the tooth surface or light curing. The chemical set renders the material resistant to edge chipping.

Customer service was very professional and they knew exactly what they were doing. “

Dental practice managers and dentists from all over the UK celebrated achieving a nationally recognised management diploma with UMD Professional at an awards ceremony in London this month.

More than 50 managers achieved an Institute of Leadership & Management (ILM) qualification in 2012 and underlined the success story, many travelled to London to receive their certificates from Charles Elvin, Chief Executive of the ILM. The managers were joined by several dentists who were also presented with their Diplomas. These included Dr Martin Delahay who is the first person to achieve the ILM Level 7 Diploma in Strategic Leadership and Executive Management.

UMD Professional currently has grants available for their regional qualification courses. For more information, please contact Penny Parry at UMD Professional on 0120 8253 270.
