A Brighter, Healthier Smile with Beverly Hills Formula - Stand C22

The Beverly Hills Formula continues to develop its ever-growing range of advanced, at-home, whitening solutions with this low abrasion Perfect White toothpaste value pack.

Those looking for a whitening boost will appreciate the high-performance whitening power of Perfect White's 5x whitening value pack. The new formula contains 91 per cent of stains over a five-minute period. Teeth feel smooth and cleaner after brushing, helping remove stains and keeping teeth white with this revolutionary whitening technology.

Delegates can expect to see some old favourites with the popular Dentist’s Chair G/A White Whitening Paste. This paste contains Potassium Nitrate to help avoid the pain of sensitive teeth and gums, and a high-performance whitening boost, Perfect White Sensitive new formulation. This whitening paste is designed to be used as part of a daily oral care regime.

Complementing the range, Beverly Hills Formula moisturising Mouthwash provides long-lasting relief of dry mouth and is recommended to be used as part of a daily oral care regime.

For more information visit Beverly Hills Formula - Stand C22

Henry Schein Dental understands that to run a successful practice, dentists and their teams need to have access to a wide assortment of products, services and support.

To help practitioners achieve their aims we offer local account managers supported by teams of dental product specialists. Our team has years of expertise across a range of disciplines, making them the perfect choice to assess your needs, ensuring we deliver the solutions best suited to your practice.

So whether you need help with decontamination, digital imaging, surgical equipment, implants, whitening products, service and repairs or even business support, we can provide the advice and support you need to help you run a more efficient and profitable practice.

Visit us at Stand K35 at The Dentistry Show 1st – 2nd March 2013 and find out more about how maximise the benefits of integrating 3D imaging, CEREC and implants into your practice.

Visit Healthcare Learning: Smile-on, Stand S47

Visit Healthcare Learning: Smile-on, Stand S47

Widely recognised as a leading provider for online dental learning and education, Healthcare: Learning will be exhibiting all their qualifications and programmes at The Dentistry Show 2013. The expert team will be on hand to provide delegates with all the information they need to develop their careers.

In addition, Healthcare: Learning: Smile-on will also be in partnership with The Dentistry Show in developing a 'Face to face with the experts' exclusive Preview Evening at the Dentistry Show. The event will be attended by sales staff from NHS Greater Glasgow and Clyde, as well as independent dental practitioners.

Visit for more information about Healthcare Learning: Smile-on, 01287 870999 or email info@healthcarelearning.com

Oral-B - The innovation of Oral-B Pro-Expert toothpaste lies in the synergy of the combination of the two main ingredients which provide the united strengths of stains-fighting antemicrobial properties and polyphosphat with a gentle cleaning effect to help national healthcare systems.

Oral-B also manufactures a range of electric toothbrushes and re-fill heads. Their flagship model, the Oral-B Triumph with SmartGuide incorporates novel compliance-enhancing technology using a unique remote display and comes with a broad range of oscillating-revolving re-fill heads. Oral-B also have the Triumph power brush re-fill heads, giving patients a re-fill head that caters for different needs.

For more information contact Oral-B on 01287 870999.

Shine a Light on EU Compliant Light activated tooth whitening

Shines a Light on EU Compliant Light activated tooth whitening

To highlight the practice opportunities that whitening presents for dental professionals following EU regulation changes Philips will be running its real time whitening workshops at the Dentistry Show. The workshops will coincide with the UK launch of Philips new light activated tooth whitening system which introduces a new six per cent whitening solution formulated specifically to be used with its pioneering Zoom Whitelight LED lamp. The new whitening gel contains a per cent H2O2 formula which is combined with a pH booster and i Li Ze of the product also contains Amorphous Calcium Phosphate (ACP), which reduces sensitivity, protects enamel and helps improve the life of the tooth. The gel is then activated by Philips Zoom Whitelight LED lamp. A protocol developed by Philips requires 4 x 15 minute cycles with pH booster using Zoom Whitelight during an in-office practice and this is coupled with the provision of a customised home whitening kit to ensure the whitening kit (the latter has just won the prestigious Product of the Year Award).

Real time workshops will demonstrate the new system and the protocols developed by Philips for both light activated in-practice and take-home tooth whitening in real time. The six whitening workshops take place in Workshop Suite 5 throughout the event. Delegates who are not able to get a place on the workshop can also visit Philips stand B20 at The Dentistry Show.

For more information or to make an appointment for a personal practice visit or to buy the new system direct call 0800 0567 222.
