**Gapsell** - The decisive weapon against periodontalitis. Do you manufacture onlays, gaps and hollow spaces between implant and structures are inevitable for all compound implants. These gaps can be removed in dependence on fabrication precision. However, they are very complex: bacteria-proof Already 16 years ago, the Clinic for Prosthetics and Maxillofacial Surgery of the Heinrich-Heine University, Düsseldorf, Germany under the direction of Prof. Dr. Dr. Filzmann, has started to find a solution to this problem.

Gapsell ® (Galer & Wehle) is based on a special silicon matrix ingradient composition which prevents proliferation of bacteria. It is used directly after fitting of the implant with the first layer of the locking screw. The implant is then durably protected against infections by bacteria, viruses and fungi from the very beginning. Gapsell® is most easy in application as the material is offered in small portion steps, together with a special applicator. A short product video can be found at www.werken.de or YouTube.

Fig Gapsell® seals implant gaps and hollow spaces.

**3M ESPE Most Innovative Company for ninth year in a row**

3M ESPE has been named the ‘Most Innovative’ company in the global dental industry by The Anheim Group, distributor of DentalFax Weekly, for the ninth consecutive year.

The recognition was published in the 2013 Dental Industry review and was based on new product approvals and international patents - of which 3M ESPE achieved 63 in 2013.

In addition to new product clearances and patents, the review highlighted several products introduced by 3M ESPE in 2012, including: Sol-Lee ‘Spray finishing and polishing wheels, Imprint 45VP impression material and a software update for the 3M true definition scanner a real advantage.

To find out what solutions from the industry recognized Most innovative company in dentistry could support your practice, contact 3M ESPE today.

For more information, call 0845 602 5094 or visit www.3Mespe.co.uk.

**The power of one**

Scotchbond universal adhesive from 3M ESPE can be used in all adhesive techniques.

The bonding agent is suitable for use in both direct and indirect indications, providing excellent retention and, with its high filler loading, excellent wear resistance including enamel, dentine, glass ceramic, acrylic, metal and non-precious alloys and composites without additional primer.

Scotchbond universal adhesive features a flip-top vial for convenient one-handed operation and the nozzle’s design allows for controlled dispensing.

This adhesive is truly universal – call 3M ESPE today to receive a sample of Scotchbond universal adhesive, and see for yourself.

For more information, call 0845 602 5094 or visit www.3Mespe.co.uk.

3M ESPE and Scotchbond are trademarks of the 3M Company.

**Strength and beauty**

When patients need help with bad breath, come to the rescue with a sample CB12 Monodose pack.

With its low concentrations of zinc, sorbate and chlorhexidine, CB12 neutralizes the VOCs* which can cause bad breath. And because it works even for up to 12 hours, it can offer adherents release from the anxieties that may accompany the taste problem.

Available in a handy monodose pack that contains one 10ml dose, CB12 tackles the cause of bad breath, rather than just masking it. Easy to use and with a refreshing minty taste as well as added fluoride, CB12 Monodose provides a simple and highly effective way for patients to experience the benefits of CB12 and relief from their symptoms.

Large enough for easy handling, but small enough to be discreet and fit in the pocket, make CB12 Monodose the first line of defence against bad breath. Come to the rescue now and order your supply of CB12 Monodose samples.

For more information about CB12 Monodose and information on how you may benefit your patients, please visit info@medpharma.co.uk or visit www.cb12.com.

**Digital Dental**

New high resolution 3D endodontic imaging from Digital Dental.

Digital Dental now offer the complete Profitas® 3D family from Planmeca.

This includes a new image mode specifically designed for endodontic diagnosis, which further extends your capabilities with the latest advances in cone beam technology. Not restricted to implant planning, assessment of endodontic treatment complications, diagnosis of periapical pathology, root canal system anomalies, root curvatures, true measurements and the determination of root apex locations in peri-surgical planning are just some of the more complex cases where viewing the anatomical features in 3Dimensions is critical.

The Planmeca Profitas® 3D family delivers highly focused, noise-free, high resolution 3D volumes for endodontic and periapical imaging; new ultra-low dose mode for volumetric assessment planning, and now multiple small volume imaging for implant planning. So cost effective they are ideal for any specialist or multiphysician practice.

For more information visit www.digitaldentaltc.co.uk or call 0800 755 5442.

Quicklase have released the new 3w laser that is ideal as an introduction laser and priced at only £2,495 inc vat and delivery! The 3w laser would be used for day to day dentistry for basic procedures such as cleaning for accurate impregnations and gingival re-contouring for better fitting veneers and crowns, this is in addition to the standard procedures Gingivectomy, Gingioplasty and implant recovery. Also available is a 4w and the model as an ‘air freon’ dual, which is an 80mm air nozzle with TwinAir technology. The DualLaser lasers are also used for teeth whitening and TMJ, as extra cost the lasers come with three additional attachments. The DualLaser lasers come with everything you need from patients marketing to online training. Quicklase are the only British manufacturer of soft tissue lasers providing you with local backup and support. This also means that you can offer the DualLaser lasers at very competitive prices, making it easier for you to offer laser assisted dentistry and in turn make your surgery more profitable. Quicklase have also released online training for laser assisted dentistry, hand files, gutta percha, rotary files and paper point. Visit our website http://www.quicklase.com/product/endo for more information on our endo products.

Keep disinfection wipes fresh and close at hand

Provide quick access to Wristox Wipes with the Wristox Wipe Wall Mounted Dispenser system – brand new and available from The Dental Directory.

Early mounted using an adhesive pad or wall fitting kit, this dispenser can be locked for security in public areas. When it’s time to refill, the clam-shell design makes doing so easy.

Its sleek, ergonomic shape perfectly complements the modern practice. The unit is also made for durability, being a strong white plastic body and a polished finish.

Every dispenser has a ‘trey fred’ spring loaded tip that prevents air from entering the wipe pouch, keeping the wipes inside fresh and moist.

**The Dental Directory – for all dental supplies, big and small**

When Albury Dental Care in Edinburgh refurnished their practice, they chose The Dental Directory as their supplier of choice for large equipment. Today, they still call on The UK’s largest independent dental dealer for the rest of their dental supplies.

“We use The Dental Directory for everything right across the board. I estimate that about 90% of our products are sourced through them,” co-owner Murray Bremer says.

Murray turns to The Dental Directory for virtually all his dental product needs because of their incomparable range of over 27,000 products, efficient delivery service and unmatchable product “I tend to look at the big picture when it comes to managing the business, and of course everything helps. The Dental Directory, with their dependable service and low prices, certainly contribute to it in terms of our Statue of Management.”

For more information, contact The Dental Directory on 0800 585 585, or visit www.dental-directory.co.uk.

**Step into Summer with The Dental Directory**
