**Exciting News, the Lisa autodrive from WBH now comes with a brand new effective fast cycle into the Lisa 500 sterilizers, WBH now offers the option of a true ‘one stop shop’ for all your sterilisation needs. In addition to the proven Class B cycles and the proven ISO B function, which minimises the risk of bacterial contamination, the Lisa 500 now offers the option of an even faster more economical sterisation cycle at no extra cost. The Lisa has now been further developed into the new ‘Fast 114 Cycle’ which allows you to sterilise unwrapped handpieces as well as sterilised instruments in just 14 minutes. In order to better support our customers, WBH Premium Care and Premium Camilo Service Plan for WBH decontamination products have been developed to enhance your decontamination facility in line with current guidelines, ensuring peace of mind that your sterilizers are working at peak performance. WBH’s 24-hour online support offers additional information and decontamination guidance at www.wbh propiedad.com. For further details regarding the full range of WBH products and services, please contact WBH UK Ltd or email info@wbh.co.uk or +44 (0) 1727 699992.

**Target Bad Breath with New CB12**

As dental professionals you are well aware that bad breath is a recurring and persistent problem for half of the population. It is a common cause of bad breath/foul breath, is the creation and escalation of companionships (ie bad breath), and which are formed as the mouth bacteria break down food particles. While traditional mouth rinse treatments work by masking the smell, often only for short periods of time, CB12 has two active ingredients which combine to eliminate the VSCs at their source. A feature of CB12’s patented technology is that it provides long-term protection inside the mouth, ensuring it remains effective for longer, and published clinical studies have shown it is effective for at least 12 hours. CB12 also contains fluoride to help prevent tooth decay and promoting overall oral health. One strength, available in two forms, mint and mild mint, to suit all. Delivering effective and instant protection from a single 10ml dose, CB12 is a clinically proven breakthrough in the elimination and management of bad breath.

For more information on CB12 please visit www.cb12.com

**Managing the diabetic patient: a potential role for HBOT**

A recent study published in the Journal of Diabetes Mellitus (in press) has suggested that hyperbaric oxygen therapy (HBOT) might be effective in improving blood glucose control in patients with diabetes. The study tested 16 patients with type 2 diabetes who had not achieved good control of their blood glucose despite intensive medical management. The patients were randomly assigned to either receive HBOT or standard medical management alone. After 12 weeks, the patients who received HBOT had improved fasting blood glucose levels compared to those who received standard medical management alone. The results suggest that HBOT may have a potential role in the management of diabetes, particularly in patients who are difficult to control with standard medical management. Further research is needed to confirm these findings and to determine the optimal parameters for HBOT in the management of diabetes.

For more information please contact the Academy of Hyperbaric Medicine at info@hyperbamed.org or visit www.hyperbamed.org.

**Quality Endodontic Distributors Ltd QED’s Superior B&L–alpha B&L in perfect combination**

The Superior B&L-alpha enables fast and easy delivery of warm irrigation fluid for the irrigation of furcation communications, facilitating rapid obturation of even the most difficult root canals more completely, in less times, and with less patient discomfort. Cordless, compact and easy to handle, it features variable speed temperature settings which allow Practitioners to control the flow characteristics of the material, a rechargeable lithium-ion battery which ensures extended operational time and a choice of needle size 25g and 25g with a 3000 mmol solution for improved access. Supplied with the three tips, the Superior B&L-alpha is the ultimate in cordless warm vertical compaction devices and screwdrivers. It features a lithium-ion battery which features multiple temperature settings to accommodate both gutta percha and sealer, with a quick heating time that reaches temperature within 10 seconds. Completely cordless, compact, lightweight and straightforward to use, it incorporates a rechargeable lithium-ion battery which facilitates multiple uses on a single charge and allows the operator to complete many cases without the need to recharge. For further information telephone Quality Endodontic Distributors Ltd on 01733 644667 or email web@ qedenda.co.uk, or visit www.qedenda.co.uk or contact your local QED Salesperson.
Exciting New Products from GC UK at BDA 2013

GC are at the forefront of research and development and regularly introduce new products to support dentists. Here are a few to have a look at. The latest addition to the GC range is the GC Evitdent Phospho. This tooth colored composite is designed to be used as dentin replacement.

Already a leader in the field of glass ionomers, GC are pleased to introduce the GC Fuji IX GP EXTRA, a high strength glass ionomer cement that is ideal for use as dentine replacement, especially in the anterior region.
