Stop by STL Practicallife Soak for only £7.75 before the end of April and get a second STL Practicallife Soak for free. Kemdent is a disinfectant for the disinfection of, and oral care products that provide the united strength of numerous fluorides anti-microbial properties and polyphosphate as a gentle cleansing agent to inhibit calculus and stains. Oral-B also manufactures a range of electric toothbrushes and floss heads. Their flagship model, the Oral-B Triumph with SmartGuide incorporates novel compliance-enhancing technology using a unique remote display and comes with a broad range of escalating rotating 1200 head. Oral-B also has the T-zone power brush soft head which gives the opportunity to keep a manual feeling whilst achieving a better plaque control.

Infection prevention and control is a single most important task that all the dental team are involved in it. It is important to emphasize the prevention and control of cross-infection which is one of the responsibilities of everyone, CDC and the HTM guidelines recommend that impression materials are placed immediately after removal from the mouth.

For further information please call michelle@ab-communications.com, 07920 178179.

Oral-B

It is important to emphasize the prevention and control of cross-infection which is one of the responsibilities of everyone, CDC and the HTM guidelines recommend that impression materials are placed immediately after removal from the mouth.

The mouth and salivae are ideal places for bugs. They have a warm moist environment, making it easy for bugs to be passed to dentists, dental technicians and then onto patients. Practicallife Soak needs only three minutes to disinfect bacteria, fungi and viruses. This disinfectant concentrate is dispensed from the dispenser with a required volume to make a 3% solution, e.g. for 1 litre soak, 30 ml would be dispensed. Visit www.kemdentrex.co.uk for further details.
